

Table of contents

In order of presentation

Transformer Optimisation Framework for Life Cycle Management	01
Lutfiye Allahmanli, Prof. Gopi Chattopadhyay, Denise Brown	
Smart Grid Applications – a European experience	13
Aidan Roberts	
Condition Monitoring as a Tool for Strategic Asset Management:	31
Carl Johnstone, Graham Moss, Gordon Wilson	
Properties of Aging Mineral Insulating Oils in Service	43
Per Wiklund, Bruce Pahlavanpour	
Assessment of Instrument Transformers by Dielectric Response Analysis	59
Stephanie Raetzke, Maik Koch, Andreas Schröcker, Michael Krüeger	
DGA prevents 330kV Cable Failure	69
Peter New	
Bushing Service, why is it necessary	83
Michael Christen	
How to Environmentally Secure Discharges of Rainwater	
Fredrik Ostbye (paper not received)	
Dielectric Frequency Response Measurement Technology for Measurements in High Inteference AC and HVDC Substations.....	93
Joacim Sköldin, Peter Werelius, Matz Ohlen	

The Challenges of Unexpected Events Jeff Polkinghorne	105
Dissolved Gas Analysis of Ester Fluids Dave Hanson, Kevin Li, Jorge Plasencia, John Luksich, Art Lemm	115
Modern Tools for Diagnostic Measurements on Power Transformers Michael Krüger, Maik Koch, Key Rethmeier, Alexander Kraetge, Alan McGuigan	133
End of Life Issues for Transformers – an Insurer’s Perspective Terence Lee	149
How to Improve your Power Transformer Quality and Reliability by Factory Testing Martin J Heathcote	161
Earthing of Medium Voltage Power Transformers Peter Wong	171
Transformer Procurement Process – Update on Work of Cigre WG A2-36 Tom Breckenridge, Simon Ryder, Chris Hodgson, Ian Hunter	179
Integration of New Transformer Monitoring Technologies into A Modern IT Infrastructure Patrick Picher, Claude Rajotte, Denis Nadeau	193
Spectral Imaging Enhancing Investigation Capabilities on HV Plant Paul Wilson	203
Fault Current Limiter Mohinder Pannu, Yoram Valent	219
