

## TABLE OF CONTENTS

**Deployment of monitors system-wide for condition based maintenance of substation equipment**  
- Terry Snow (Dynamic Ratings Inc)

**Geomagnetically induced currents (GIC) monitoring system** - Len Borowski, Chunali Zhang, Gary Russell (Powerlink Queensland)

**Transformer sound enclosures** - Stuart McLachlan (Environmental Results)

**FRA use for winding compression monitoring** - Joe Tusek (Aurecon) Mark Wexler and Ken Budin, (Wilson Transformer Company)

**Single phase regulator failures** - Colin Feely (Powercor Australia)

**The design, manufacture and operation of a 33kV Quadrature booster** - Gilbert Mahangwe, Paul Dyer, Sotiris Georgiopoulos, Dr Cristiano Marantes (UK Power Networks) and Mohinder Pannu, (Wilson Transformer Company)

**Advances and experience of new dry type HV CT and bushing technologies** - Eric Euvrard, RHM International, Dr Valery Davydov, Consultant

**Dynamic resistance measurement on OLTC's a follow up** - Dr Raka Levi (DV Power) and Keith Bensley (Pacific Test Equipment)

**Dry transformer bushings with composite insulators – the obvious combination for increased reliability** - Lars Jonsson, Anders Holmberg, Mattias Lundborg (ABB Sweden)

**Dielectric response measurements in frequency temperature and time domain** - Peter Werelius, Matz Ohlen, Mats Karlstrom (Megger, Sweden) and Jialu Cheng (Megger, China)

**Obstacles associated with winding resistance measurements of power transformers** - Charles Sweetser (OMICRON electronics)

**Comparison of transformer paper DP samples and oil furan analysis: experiences over 18 years** - Peter McClean (Pioneer Generation), Ami Singh (Genesis Energy), Brent Wilson (Meridian Energy), Colin McDonald (Contact Energy) and Wade Enright (Viva Technical Solutions)

**Review of different transformer fluids with focus on effects of viscosity** - Johan Weesmaa, Pär Wedin, Linnéa Bergeld, Per Wiklund (Nynas)

**Controlling the moisture of transformer oil** - Neil and Martin Partridge (Brownell Ltd)

**Cable boxes – theory, practice and maintenance** - Michael O'Brien (Alstom Grid)

**Installation of SF<sub>6</sub> transformers** - Matthew Gibson and Nemet Nikpour (Ausgrid)

**Environmental impact on transformer thermal performance** - Dr. Yuriy Odarenko (Wilson Transformer Company)

**Software based technique for the identification of transformer faults in real time** - A. Abu-Siada (Curtin University)

**A comparison of dielectric response diagnostic methods of transformers** - Tapan Kumar Saha, Chandima Ekanayake, Yi Cui & Hui Ma (The University of Queensland)

**New paper free insulation technology for dry high voltage condenser bushings** - Urs Krüsi, Ansgar Dais, Zoran Zic, Daniel Egger (ABB Switzerland)
