

## LIFE-MANAGEMENT OF HV & MV POWER EQUIPMENT

17 – 18 April 2018

Sofitel Sydney Wentworth Hotel | Australia

28 September 2017

### Call for Papers

TechCon<sup>®</sup> Aus-NZ showcases great research and real-life case studies on life-management of high voltage and medium voltage power equipment strategies for the ageing electrical grid infrastructure. The objectives of the conference are to promote high quality papers in the field and is a great opportunity for networking.

The theme of TechCon<sup>®</sup> Aus-NZ 2018 conference is Life-Management of HV and MV Power equipment and the two-day program includes keynote, plenary sessions from a mix of international and national speakers, panel sessions on a specialized topic each day, a trade exhibition and networking/social events involving delegates and trade exhibitor companies and their staff.

Topics of interest include:

- Infrastructure Growth & Evolution
- Infrastructure Optimisation
- Infrastructure Risk Management
- Smart Grid on HV and MV network

Sessions are generally 30 minutes long with an AV component to engage the audience. There will also be time allowed for Q&A.

TechCon<sup>®</sup> Aus-NZ Planning Committee is looking to develop a high-quality program and invite speakers to share technical knowledge and information on the above theme. Papers will be selected based on quality of abstract, originality, topicality and relevance to the theme of life management strategies for HV and MV power equipment. Please note as this is a technically focused conference and the content of the papers and subsequent presentations must be technically based. Authors who provide papers or presentations that are more commercially focused will be required to change the content or risk having their submission withdrawn.

If you have a paper worth sharing, please submit your abstract in the required format to reach the [Event Manager](#) on or before 10 November 2017.

Kind regards

*Fareesha Wijesinghe*
