

TechCon[®] | 20 YEARS Aus-NZ 19

4-5 APRIL 2019 • SYDNEY • AUSTRALIA

Table of Contents

[Transition to an intelligent grid – a roadmap to the future grid](#)

by Don McPhail, Scott Gordon, Peter Kilby and Andrew McConnell Ergon Network and Energex.
Part of the Energy Queensland Group

[Assessing and mitigating the impact of large-scale solar and wind farm inverters on power transformers – a preliminary investigation](#)

by Dr. Martin, F. Zare & J. Marks, University of Queensland, G. Caldwell, Energy Queensland, L. McPherson, Essential Energy

[Solving the problem of intermittent faults in HV & MV networks](#)

by Goran Stojadinovic, Northpower

[Efficient ways of integrating solar roof PV – an economical, technical and regulatory comparison of VRDT applications](#)

by Dr. Thomas Smolka, Reinhausen Australia, Shervin Fani, Western Power, Peter Kilby, Energy Queensland, Armin Vielhauer, Maschinenfabrik Reinhausen, Dr. Dan Martin, The University of Queensland

[Benefits and challenges of ester liquids](#)

by M. Lashbrook, A. Gyore, R. Martin, M&I Materials Ltd

[Flexible loading concept to optimize life & utilization of transformer](#)

by Alan Sbravati, Putu Raditya, Kevin Rapp, Cargill Bioindustrial

[Properties of insulating liquids that impact behaviors in high voltage applications](#)

by Carl Wolmarans, NYNAS AB, Chian-Yaw Toh, NYNAS Pte Ltd

[Advanced voltage control in substations and feeders affected by DER](#)

by Hamdi Shishtawi, Fundamentals Ltd, Nick Yates, Michael Rushmer, Fundamentals Australia

[Silver Sulphide in OLTC's – root causes and proactive mitigation strategies](#)

by Dr Jelena Lukic, Jelena Jankovic, Jelena Planojevic- Electrical Engineering Institute Nikola Tesla & Marc Foata, Christoph Zieglschmid, Victor Castano, Adriano Briotto - Maschinenfabrik Reinhausen GmbH

[Earthing transformers – purpose, specification, design & operation](#)

by Michael O'Brien, GE

[New methods for non-invasive timing tests on gas insulated switchgears circuit breakers with both sides grounded](#)

by Alexander Herrera; Ari Tirroniemi, OMICRON electronics GmbH

[Experimental evaluation of status of 400 kV shunt reactor bushings in the Swedish national grid](#)

by Lars Jonsson, ABB Sweden

[Research and solution for proactive maintenance through pattern recognition – using power quality data for automatic trend analysis forecasts](#)

by Robert Olofsson, Metrum Sweden AB

[Some special design aspects for solar and wind farm transformers](#)

by Dr Yuriy Odarenko & Mohinder Pannu, Wilson Transformer Company

[Accidental contact with powerlines – look up and live](#) (no paper)

By Glen Cook, Energy Queensland

[On-site testing and calibration of instrument transformers](#)

by Michael Freiburg and Michael Krüger, OMICRON electronics

[Condition assessment methodology for transformers & components](#)

by Brian Sparling, Dynamic Ratings, Chris Beckett, United Energy, Tara-lee MacArthur, Ergon Energy
